Completely agree. Patti, could you put together a response to Bruce and send it to Jim and me first?
 Thanks,
 Michael

Michael and Patty,

I think the format for the availability session whereby we have the sessions and then a short (30 min max) Q and A session would be perfect and accomplish what Bruce desires. During the Q and A we should not use any slides, simply try and clarify questions. Likewise, if the comments are editorial in nature we can let them know that their position is duly noted and that they can formally comment on the Proposed Plan.

One other point, I can't remember if the fact sheet made it clear but regardless at the beginning of the Q and A in the availability session we need to let everyone know that the FS will not be revised and although EPA would accept comments, we are not going to respond to formal comments on the FS. Any comments are best held for the Proposed Plan when EPA actually proposes a remedy.

Jim

Patti and Jim,
 I think that we can tell him that we can close the availability session with a Q&A period. This should have the same effect.
 Let's talk when Jim is available today.
 Michael

Michael - See Bruce's message below.

We normally don't have a public meeting about a feasibility study and usually wait until the proposed plan.

We probably should discuss this before I respond to his message.

I'm in all week.

Good Morning, Patricia -

Thank you for the email. Yes, I received it and this is still a valid/current email address.

One question: Will there be a public meeting held to discuss the Feasibility Study as well? I think the Availability Sessions are helpful but I believe a general public meeting where questions can be asked and answers heard by a larger group would be very helpful. How do I go about requesting that a general public meeting be held?

Thanks.

Bruce Merchant
